

Frontline Professional Services

Leapfrog your business to the front of the line!

Make the most of your resources and increase your efficiency

At KLA, empowering you to make the most of your resources – to unlock the full potential of your business – is our top priority.

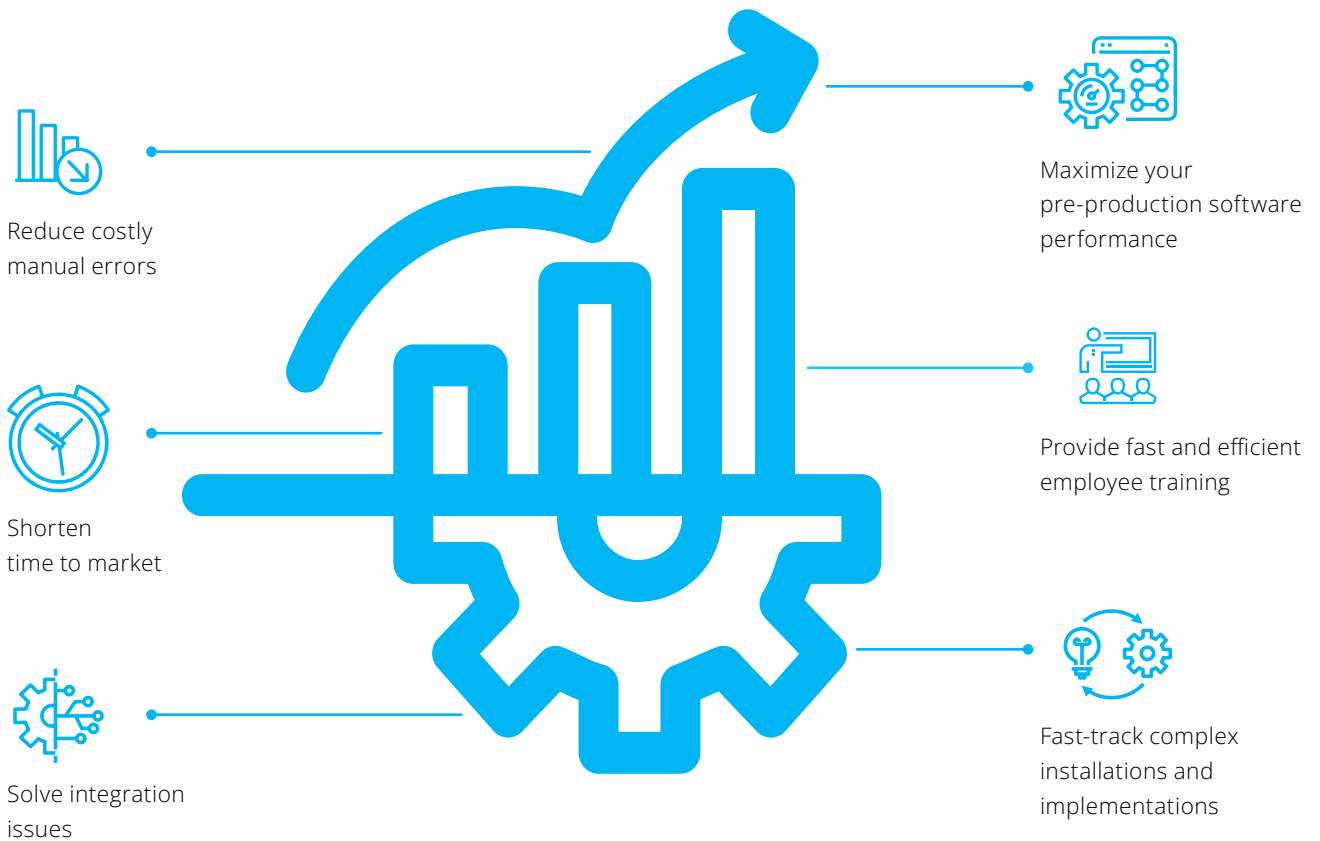

Frontline Professional Services brings together a world-class team of technical experts, consultants and support professionals who can help you make the most of your Frontline products to

optimize the pre-production process, reduce human error and improve time to market.

We provide hands-on, tailored assistance when you need it, helping you realize new possibilities for your business and setting you up for success.

Why Frontline Professional Services?

We build on our unique expertise, field experience and proven solutions to help you:

Automation

Discover unique growth opportunities with our Automation services:

- Accelerate your business with seamless data transfer and integration tools, implemented by our experts.
- Gain critical business insights from your organization's data and integrate with other systems.
- Make the most of your software with rules, specs and API information.

Integration

Rely on Frontline's tailor-made solutions for pre-production machine integration. We help you integrate ERP, MES, AOI, DI, NC drilling and rout machines, and a variety of other machines, to keep your business running smoothly.

Preventive Maintenance

Perform preventive maintenance to improve data quality and increase productivity:

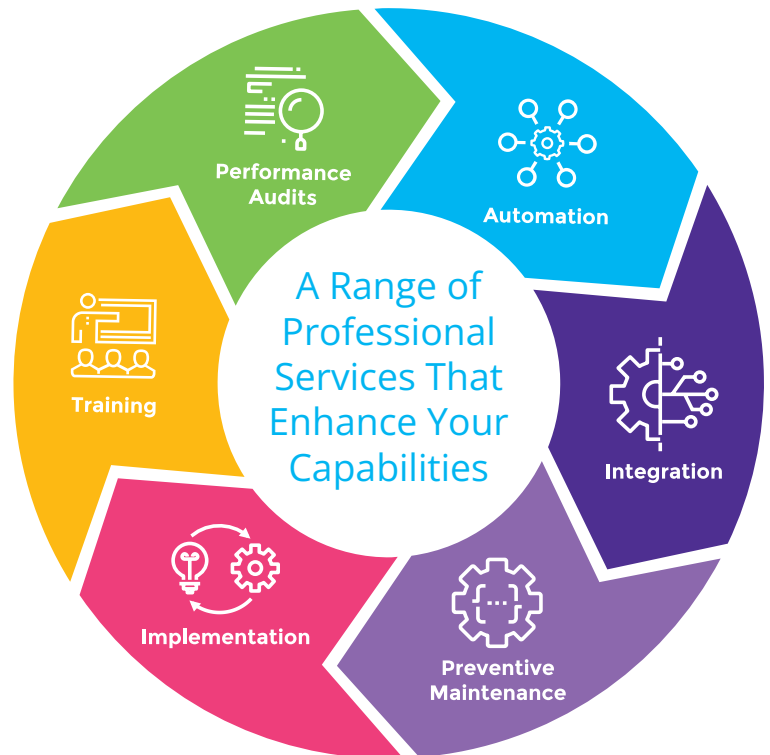

- Run regular database cleanups and performance health checks, and allow remote access for bottlenecks.
- Fine-tune performance and allow traffic to flow.
- Proactively discover health issues that might slow performance or result in system outage.

Implementation

Drive your business goals with Frontline's enhanced implementation services:

- New software implementation and deployment by experts.
- Configuration services and data migration assistance.
- Optimize your system setup and use existing customer and manufacturing data.

Training

Get training from our technical experts who know your business and objectives:

- Take advantage of our Training services – including new operator training and automation training – always customized to your unique needs.
- Upgrade employee expertise to ensure they succeed at their daily tasks.
- Master step-by-step automation writing to enhance your processes.

Performance Audits

Get a comprehensive performance audit of your pre-production processes:

- Our expert consulting and analysis services focus on developing strategic recommendations that create long-term value. And follow-up with our team will help you see it through.
- Learn how to leverage system features and functionality to best support your processes.
- Develop a greater understanding of your processes and challenges.

Why Frontline Professional Services?

When customers engage with Frontline Professional Services, they know our service is unique.
